

How to flush your Water System

*Before commencing system flush please wait for approval

- 1.) After receiving approval to flush the water lines, one person should run water out of each hose bib on the outside of your house (each hose bib should be run for 5 minutes and then you can close them).
- 2.) Once the hose bibs have been run, you must proceed to go inside of the house and run the water in the bath tub (if you have one) for 4 to 5 minutes.
- 3.) At this point you may now go to each fixture in the house and run them for 3 minutes each.
- 4.) After running all other fixtures for 3 minutes, you then must flush each toilet 3 times.
- 5.) If you have a washing machine run an empty load on it.
- 6.) Now you may safely use the water in your house
